SELECT PUBLICATIONS

Books

Speculative Education: Making Knowledge from the Ruins. (in preparation)

- Develops a theory of knowledge-making under conditions of uncertainty with applications to teaching, curriculum design, academic restructuring, and more broadly, the speculative futures of liberal education
- Introduces the practice of rendering, or working with existing conditions or “ruins” to make new knowledge, alongside the related concepts of the live problem, provisional structures, relational debt, and structural integrity, as a posthumanist approach for reimagining teaching and learning

The New Heroines: Female Embodiment and Technology in 21st Century Popular Culture. Westport: Praeger, 2016.

- Examines the cultural significance of teen and young adult female heroines across popular culture genres and media, tracing a new feminist ideal emerging at the intersection of embodiment, technology, and posthuman subjectivity
- Develops a comparative framework connecting the "New Woman" of the late 19th and early 20th century to contemporary heroines, arguing that connection with people, environment, and technology defines 21st century female embodiment represented by the “New Heroine”
